BEAR
TRAILER MFG.

Heavy-duty 1300-lb winch exceeds leading competitors' weight ratings.

Welded-on trailer jack provides clean, custom look.

Computer-controlled robotic axle construction provides dependability and durability.

Wind Guides are 36" long attached with two welded tubular steel supports.

4 drive-on bunks provide extra support and protection for your hull.

Eagle 175
Trailer

Trail Guard plug eliminates loose wiring and wireloom sheath adds protection.

Compare trailer frame size when purchasing a quality boat package. 3" x 2" tubular steel frame w/ three crossmembers.

Bunk brackets attach using two bolts and 3" x 1/4" flat steel welded to main crossmember.

Welded-on steel fenders w/ step pads are strong and durable.

High axle clearance means less chance of damage or delays on rough roads.

Lockable Trail Guard® detachable trailer tongue is standard for 16' models and longer. Deduct 20" from package length for storage length.

G3 boat packages feature custom, precision fit BEAR® trailers. The patented Trail Guard® detachable trailer tongue is standard equipment on all Eagle packages 16' and longer. Boat trailers sold by G3 are available with brakes as required. Extra charges may apply. See your local G3 dealer for provincial requirements.
